

Fenner[®] Hygienic Geared Drives

Hygienic Design

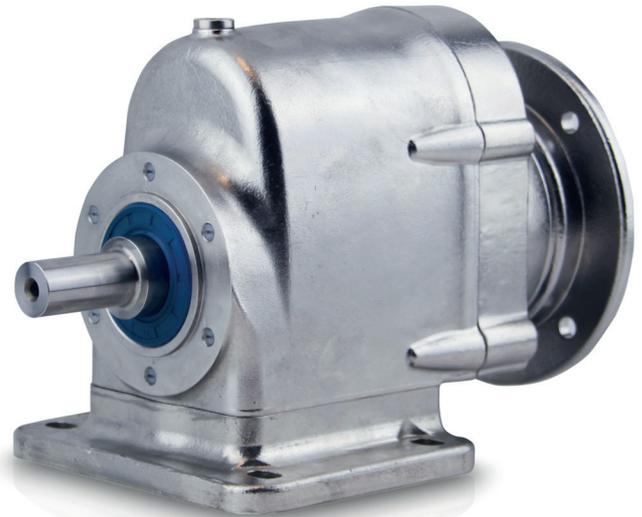

In environments that demand an especially high level of hygiene or use aggressive cleansing agents that eat traditional drives, the Fenner[®] range of Hygienic stainless steel geared drives provides complete inter-changeability with any existing motor population for simple upgrades offering up to 15 times the service life.

Benefits

- > Hygienic design, smooth and free draining surfaces
- > Corrosion and chemical resistant high quality electro polished stainless steel AISI 316
- > No ID plates, specifications are etched on the surface
- > IP66 (optional IP69 K) to withstand sanitary washdown
- > Geared unit Interchangeable with European standard footprints
- > Geared unit offer dryfit IEC mounting offering leak free fitting
- > Motor offers IEC interface with class F isolation, and O ring sealed terminal box
- > Motor comes with unique anti-condensation breather as standard
- > Suitable for frequency inverter duty
- > Built to order

Fenner[®]

Reliable | Trusted | Connected

Size Reference

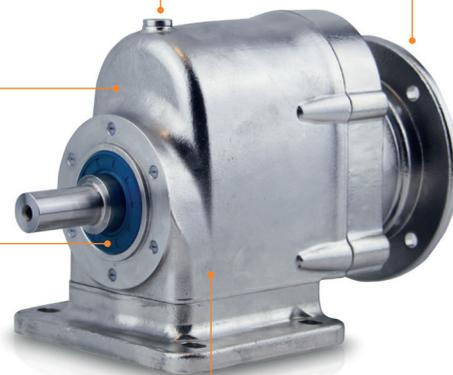

Ratio's up to 300:1 up to 3,000Nm
 Up to 7.5kW
 Shaft diameters from 18mm to 60mm
 Incline helical
 Right angle worm
 Right angle bevel

Construction

Smooth, curved and easy clean design

The unique anti-condensation breather balances the pressure difference

Product and technical details engraved in the motor

Blue oil seals
 FDA approved

Stainless Steel AISI304/316 has an electrical polished surface that guarantees a smooth finish
